▼ 4. IAM Roles and Policies
for EKS

Using Terraform to
create the IAM Roles
and Policies for EKS

Terraform files
explanation

▼ 5. Linking the Cloud9 IDE
& CI/CD VPC to the EKS
Network

Connect the Cloud9
IDE & CI/CD VPC to the
EKS VPC

Terraform files
explanation

▼ **6. Deploy the CI/CD
Infrastructure**

Create the CI/CD
Components

Terraform files
explanation

► 7. EKS Cluster Creation

► 8. Create a customized
managed Node Group

► 9. Enable AWS Load

[Amazon EKS Terraform Workshop](#) > [5. Creating a private EKS Cluster with Terraform](#) >
6. Deploy the CI/CD Infrastructure

6. Deploy the CI/CD Infrastructure

Deploy the CI/CD Infrastructure and pre-load some docker images.

In this chapter we will use Terraform to deploy some CI/CD components and pre load some images into our private ECR repository.
