Cleanup the Terraform Resources

To clean up the resources in your AWS account created by this workshop. Run the following commands:

```
1 cd ~/environment/tfekscodes/.aws-staff
```

run this script which will delete all the resources created by terraform:

This will take approximately 30 minutes to complete:

```
1 ./destroy-everything.sh
```

Check if the Load Balancer & Target Groups have been deleted, if not use the console to remove these resources.
