Knowledge check

5 minutes

1. Suppose you work for a company that builds a Massively Multiplayer Online (MMO) game. You decide to move all your services to Azure Kubernetes service. Which of the following components will contribute to your monthly Azure charge? *

○ The Master node

○ Per deployed Pod

○ Per node VM

   ✓ **You only pay for the virtual machines instances, storage, and networking resources consumed by your Kubernetes cluster.**

2. Suppose you work for an event management company. Your events website needs persisted storage. Which feature of AKS will you use? *

○ Use Azure Container Registry

○ Storage volume support

   ✓ **AKS supports both static and dynamic storage volumes for containers that need persisted storage.**

○ Enable the horizontal pod autoscaler

3. Suppose you work for a company that monitors weather conditions. Your team of developers needs to do end-to-end testing with other components in your AKS cluster. The team wants to do testing without replicating or mocking up dependencies. Which service should they use? *

○ Deployment Center

○ Draft

○ Bridge to Kubernetes

   ✓ **Bridge to Kubernetes allows for the development of code in isolation, and do end-to-end testing with other components without replicating or mocking up dependencies.**
